The Strategic Public Manager

INTRODUCTION

- Managers in the public sector face growing pressures from increasing demands, conflicting priorities, and limited resources. Government ministers and ordinary citizens demand ever higher quality of service delivery, but budgets remain constrained. Public sector managers have to more with the same or fewer resources. At the same time, they face increased scrutiny from parliamentarians, citizens, civil society, and journalists.
- Public managers need to develop a wide range of skills aside from their technical expertise including financial management, developing teams and personal interaction, and communicating with a wide range of stakeholders.
- This training course on The Strategic Public Manager will provide strategies and tools to enhance the skill set of the public sector manager and allow them to take a strategic approach to managing the issues that face today's public administration.

This training course will highlight:

- Ethics and values of public sector management
- Developing core management skills
- Building high performing teams
- Using budgets effectively
- Crisis management
- Effective communications
